EBA SIMPLIFICATION

Ten years of DPM migrations

Every DPM version needs a new mapping, because the taxonomy and the validation rules change. Below are the versions I worked on, from DPM 2.5 to 4.2.

THE VERSIONS

2016 Triodos Bank	DPM 2.5, the first XBRL. Migration to the data warehouse with Abacus and the move from the e-Line forms to XBRL, with 31 December 2016 as the first reference date.
2017 - 2019 BNG Bank	DPM 2.6 to 2.8. Built the analysis and reporting model for COREP. Updated the mapping for every taxonomy version.
2020 - 2023 de Volksbank	DPM 2.9 to 3.2. Change and regression testing in OneSumX for every new taxonomy.
2023 - 2025 NWB Bank	DPM 3.3 to 4.0. Built the ESG templates in Pillar 3, with data points that did not yet exist anywhere. Then brought CRR3 into the model.
2025 Brand New Day	DPM 4.0 in production. COREP set up through OneSumX and connected to the DNB submission.
Jan - Jun 2026 NWB Bank	DPM 4.2 and the simplification per template. Contributed to the EBA consultation response for COREP, with the impact per template supported by the CRR articles. Before that, helped implement the RTS on off-balance sheet items (EBA/RTS/2025/06) ahead of the final ITS. That ITS gives the RTS its own of-which row in C 07.00.
30 September 2027 intended date	The revised framework is expected to apply.

WHAT I DO IN A MIGRATION LIKE THIS

- For each template I make an impact analysis of what is dropped and what is added. I support it with references to the CRR articles, so someone else can follow the conclusion.
- I record the route from article to COREP cell to source while the build is under way.
- Validation rules and regression tests show whether figures that were correct last quarter are still correct. For each difference I record where it comes from.
- I keep manuals, work instructions and evidence up to date for review and on-site inspection.

Questions and comments are welcome by [e-mail](mailto:edward.scholtens@ziggo.nl).

Position as at 22 September 2026. DPM 4.4 comes in two phases. Phase 1 has reference dates 31 December 2026 and 31 March 2027. Phase 2 (4.4.1) belongs to the simplification package.
